Required Completion Date

Any additional information or notes relevant to the Temporary works design

Please note:

-Temporary works designs can take between 3-7 working days depending on the project. Your Aplant representative will advise you of a reasonable time frame once this form is submitted, this timeframe is subject to all information being submitted and any questions being answered in a timely manner.

-The cost of the temporary works design will be provided to the customer via quote, Aplant require confirmation in writing before commencing the design process.

-If significant changes are made to the design, the cost of the overall design may be subject to change.

-The determination of the ground pressure will dictate the appropriate shield for the excavation, as such the size, type and configuration of shields for the excavation is subject to change.
